

Cupboard ET10

The ET10 is a versatile cupboard made of silver fir and white ash. Thanks to its delicate design, it weighs only 38 kilograms, making it easy to transport and very resource-efficient to manufacture. The hardwood provides support and stability, while the silver fir forms the lightweight surfaces. Even the back panel is made of solid wood.
To save you the inconvenience of assembling the cabinet yourself, the ET10 is delivered fully assembled. The carcass is glued to ensure lasting dimensional stability, while the doors are fitted with folded black steel butt hinges. The shelves can be easily adjusted in height at 120 mm intervals using integrated support rails.
The cupboard ET10 is available with both symmetrical and asymmetrical door divisions, with and without a center partition. This makes it a versatile piece of furniture that can be used in the living room as well as in the kitchen, bedroom or home office. Its purist style blends perfectly into any environment. The cupboard ET10 is a sustainable, aesthetic and functional asset to any home.
